This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

THE Books, of which the following is a Catalogue, were advertised to be sold at auction, commencing on the 27th of May last, but with the proviso, that they might be negotiated for at private sale, if application should be made previous to the time set for the public sale. The opportunity for negotiation thus offered was embraced by a gentleman of extensive knowledge in the value of such collections, and it was accordingly disposed of to him, on the 19th of May; and notice immediately given that the public sale would not take place.

The Library, as such, lays no claim to perfection in works relating to America, but it exhibits no inconsiderable body of such works, almost exclusively connected with that subject. It embraced about 3000 volumes, and the number of rare works in proportion to the whole is probably much greater than any similar collection in the country. Very old books are not always the scarcest. Many could be named, printed within a century, much rarer than others printed even two centuries ago. This may be owing to any one or more of numerous circumstances or accidents which constantly attend on all publications. Many works published since I have been collecting, (now about *twenty-one* years,) had they not been secured at or near the time of publication, would at this day, be very difficult to be obtained.

About 700 copies of this catalogue were printed to accommodate the anticipated public sale, but which from the circumstance above named, remain on hand. It was thought that a catalogue of such a department of literature, though far from perfect, might be desirable to gentlemen making similar collections, and is therefore offered for *sale*.
